

# Gas Import Jetty and Pipeline Project

## Drop-in information session

**When:** Thursday, 15 March from 6pm to 8pm

**Where:** Cowes Cultural Centre, 91-97 Thompson Avenue, Cowes

AGL are currently planning a project that will source gas from Australian and international suppliers to use in south-eastern Australia. Crib Point has been identified as the preferred option for the import jetty to accommodate this and a feasibility study is now underway.

If the project goes ahead, LNG will be transported by ship from interstate and overseas and transferred to a Floating Storage and Regasification Unit (FSRU) moored at the existing Crib Point jetty. An FSRU is a ship that can transport, store and convert LNG back into gas prior to releasing it into the domestic gas pipeline network. A new pipeline will be constructed between Crib Point and Pakenham.

AGL is hosting a drop-in information session at Cowes Cultural Centre. Representatives from AGL, and environmental consultant's Jacobs will be on hand to provide information on the project, hear any concerns or ideas and answer any questions community members may have.

This is an informal session where community members can stop by anytime between 6pm and 8pm to ask questions of the project team.

### **More information**

If you are interested in the project but cannot attend this session you can find more information on the project at [agl.com.au/cribpoint](http://agl.com.au/cribpoint) or you can call Jay Gleeson, AGL Community Relations Manager, on 0499 027 630.
